

Date of analysis: 2007-09-26

Order number: L0714398

Lab number: U10346304

## **Analytica analyzes EuroAd**

**ALS Scandinavia AB is a company within the ALS Laboratory Group which focuses on the development of services, primarily in the field of plasma analysis for metals and other elements (including isotopes), particle and material analysis and analysis for organic substances. Industry, research, the outer environment, working environment and medicine are just a few of the areas of application for the company's work. ALS Scandinavia AB and Analytica, its laboratory in Luleå, hold Swedac accreditation.**

On 26 september 2007, EPS commissioned Analytica to analyze all metals (inorganic compounds) in the EuroAd fuel additive. During this analyze, we have established that EuroAd does not contain any substances which have any adverse impact on humans, engines or the environment.

Semi-quantitative screening analysis by ICP  
The analysis is carried out by ICP-AES and ICP-SMS (HR-ICP-MS).
